Model building:

Logistic regression score (logistic_model): 79.45945945945945

Decision tree score (tree_model): 72.97297297297297

Random forest score (forest_model): 77.29729729729729

XGBoost score (xgb_model): 72.97297297297297

Model with highest accuracy is: logistic_model
